The Benefits of Climate Change

Global Warming at the Departmental Level

Sandra K. Masur
Professor, Ophthalmology
Mount Sinai School of Medicine
Chair, Women in Cell Biology
American Society for Cell Biology

IWIN
16 September 2011

Climate Resources

IWIN Presentations & Readings:
Diana Bilimoria, Professor Organizational Behavior, Case Western Reserve University
Marie Chisholm-Burns, Randy Richardson, Helena Rodrigues, U. Arizona, ADVANCE Program

A Conversation With Scott E. Page
In Professor’s Model, Diversity = Productivity
By CLAUDIA DREIFUS

In the long-running debate on affirmative action, Scott E. Page, a professor of complex systems, political science and economics at the University of Michigan, is a fresh voice.

The Power of Diversity
(studied by computer simulation, in psych lab and retrospective analysis)

• Breakthroughs emerge by looking at complex problems from diverse perspectives.
• Inclusive enterprises with a diverse work force that recognize and value unique individual contributions tend to be more successful than more homogeneous ones – lessons from business.
• As the complexity of scientific problems increases, the need to build and to work within inter- and multi-disciplinary teams increases.

Evidence for a Collective Intelligence Factor in the Performance of Human Groups

Anita Williams Woolley,1* Christopher F. Chabris,2,3 Alex Pentland,3,4 Nada Hashmi,3,5 Thomas W. Malone3,5

Psychologists have repeatedly shown that a single statistical factor—often called “general intelligence”—emerges from the correlations among people’s performance on a wide variety of cognitive tasks. But no one has systematically examined whether a similar kind of “collective intelligence” exists for groups of people. In two studies with 699 people, working in groups of two to five, we find converging evidence of a general collective intelligence factor that explains a group’s performance on a wide variety of tasks. This “c factor” is not strongly correlated with the average or maximum individual intelligence of group members but is correlated with the average social sensitivity of group members, the equality in distribution of conversational turn-taking, and the proportion of females in the group.
Why does it matter that we lose women & minority faculty and scientists?

When we lose women & minority faculty and scientists, we lose the power inherent in diversity.

Diversity creates group intelligence.

Be proactive in hiring, promoting, and retaining minorities and women.

---

Why Focus on Improving Departmental Climate?

- Improve departmental stability
- Increase faculty & student productivity
- Recruit & retain faculty and students
- Promote respect, collegiality, inclusion, collaboration, and cooperation in department
- Improve the science

Chisholm-Burns, Richardson & Rodrigues, University of Arizona ADVANCE Program
Definition and Benefits of Positive Climate

- The degree to which the environment is supportive of individuals’ work success and satisfaction (Riger et al., 1997)
- Dynamic process, not a condition
- Improves research excellence, productivity, faculty & student recruitment & retention efforts, & departmental stability

Chisholm-Burns, Richardson & Rodrigues, University of Arizona ADVANCE Program

Commitment & Work-Life Balance Issues Are Not Gender Dependent

- Both women and men rank science higher than their private lives (64% vs. 61%, respectively) (Sonnert, 1995)
- Both women and men report working harder when they can contribute to the department (Bowen & Schuster, 1986)
- Both women and men report that marriage impacts careers (Sonnert & Holton, 1995)
- Men are just as likely as women to report difficulty in work-life balance (Levine & Pittinsky, 1997; Hill et al., 2001)

Chisholm-Burns, Richardson & Rodrigues, University of Arizona ADVANCE Program
Climate Perceptions Differ by Faculty Gender

Gender Equity Perceptions Differ by Gender

Virginia Tech 2005 AdvanceVT Faculty Work-Life Survey and Faculty Exit Survey

Advance Survey, N=816; Includes combined responses of strongly agree and somewhat agree; *Items significantly different by gender, p ≤ .05

Diana Bilimoria, IWIN 9-23-2010
Why Focus on Department Chairs?

- Individuals experience climate in their immediate workplace – the department
- Chairs can significantly influence women’s experiences in their departments
- Chairs’ perspectives of climate differ from those of other faculty, especially women faculty

Study of Faculty Worklife at the University of Wisconsin-Madison, 2003

Chairs & Faculty Differ in Perception of Climate

WISELI: Enhancing Departmental Climate
Goals of WISELI Chairs’ Climate Workshops

- To increase awareness of climate and its influence on the research and teaching missions of a department
- To identify various issues that can influence climate in a department
- To present research on how unconscious assumptions and biases may influence climate
- To enable chairs to assess climate in their own departments
- To provide chairs with opportunities to enhance climate in their departments by learning from each others’ experiences and ideas.
- To provide chairs with advice and resources they can use to enhance climate in their departments

Chairs & Faculty Climate Perception After Workshops

Percent Agree: The Climate for Women In My Department is Good

WISELI – preliminary results
Conclusions and Caveats
from WISELI Workshops

• Institutional Transformation takes TIME
• Constraints on ability to undergo “transformation”
  – Culture of Institution – Hierarchical? Driven by strong faculty governance system?
  – Size of Institution
  – Availability of Resources – time, personnel, funds
  – Support of Top Administrators
  – Turnover of Administrators and Chairs.

The Impact of Committed Leaders
  – leaders have a disproportionate impact on organizations because of their status as authorities.

1) establish and publicize policies to increase fairness,

2) legitimize and support the leadership of both women & men.

Why So Slow? The Advancement of Women. Virginia Valian
Impact of a Leader (1)

Chairman of Medicine, John Stobo, MD
Johns Hopkins Medical School - 1990 (Emma Stokes, consultant)

• Women faculty earned less than men and advanced more slowly.
• Appointed a committee to evaluate situation and develop ways to deal with gender-based problems.

Impact of a Leader (2)

Stobo’s initiatives based on the committee’s findings included:
• Annual faculty evaluations with explicit info re progress.
• Monthly meetings with concrete mentoring for moving up in career.
• Senior faculty were given explicit info on how to mentor.
• Important meetings moved from outside normal hrs.

Impact on the Dept of Medicine
• 1990 there were 6 women Assoc Profs

• 1995 there were 26 women Assoc Profs.
Impact of a Leader (1)

Larry Summers  
27th President of Harvard University (2001-2006)

Impact of a Leader (2)

Dr. Summers resigned in the wake of a no-confidence vote by Harvard faculty

- Summers’ conflict with Cornel West
- financial conflict of interest questions regarding his relationship with Andrei Shleifer
- a 2005 speech in which he suggested that the under-representation of women in science and engineering could be due to a “different availability of aptitude at the high end,” and less to patterns of discrimination and socialization.

Impact of a Leader (3)

- Summers appointed two task forces (2005)
- The task forces’ recommendations included:
  - Senior Vice Provost for Faculty Development & Diversity
  - Increased recruitment efforts
  - Implemented improved mentoring and advising
  - Instituted retention strategies (new tenure track for jr faculty)
  - Established official parental leave and automatic extension of tenure clock
  - Grants of up to $20,000/yr to 50+ faculty members for childcare
  - Dependent care fund for children to travel with parents to conferences
  - New babysitting service this fall

Harvard’s Evolving Faculties by Jonathan Shaw
Harvard Magazine October 2011

More Women & Minority Appointments

[Graph showing faculty demographic trends]

Harvard’s Evolving Faculties by Jonathan Shaw
Harvard Magazine October 2011
More Women Senior Appointments

Across the University, the percentage of new senior faculty who are female more than doubled from 1985-86 to 2010-11, while the percentage of minorities increased by half.

Best Practices – University of Michigan ADVANCE Program
Best Practices of Faculty Mentoring

• U Michigan CAS
  – Dept. chair and new faculty member develop a mentoring plan addressing teaching, graduate supervision, and research
  – Chairs fill out a section on mentoring in their annual reports.
  – Annual college-level meeting open to all tenure-track faculty to discuss the requirements for tenure and promotion and the P&T process

• U Penn
  – Each school designates a senior faculty person responsible for the management of the faculty mentorship program
  – Specific responsibilities and expectations of the mentor are clearly stated in the school’s policy and distributed to the junior faculty member along with the school’s promotion guidelines
  – Faculty mentoring considered as one of the university citizenship criteria for promoting senior faculty from Associate Professor to Full Professor
Best Practices of Faculty Mentoring

• U Michigan CAS
  – Dept. chair and new faculty member develop a mentoring plan addressing teaching, graduate supervision, and research
  – Chairs fill out a section on mentoring in their annual reports.
  – Annual college-level meeting open to all tenure-track faculty to discuss the requirements for tenure and promotion and the P&T process

• U Penn
  – Each school designates a senior faculty person responsible for the management of the faculty mentorship program
  – Specific responsibilities and expectations of the mentor are clearly stated in the school’s policy and distributed to the junior faculty member along with the school’s promotion guidelines
  – Faculty mentoring considered as one of the university citizenship criteria for promoting senior faculty from Associate Professor to Full Professor

• Stanford Medical School
  – Mentor assigned as soon as faculty member is hired; others may be added later by the faculty; mentors meet every six months with mentees

“How” We Mentor Affects Career Outcomes

**Women mentees:**
- Were mentored mostly about:
  - Psycho-social support (understanding themselves and the ways they operate, navigating politics, and work-life issues)
  - Developmental advice (guidance about ways to change themselves) and extra work assignments including extra travel and meetings
  - Had mentors with lower clout, after controlling for lower post-MBA starting position

**Men mentees:**
- Were mentored mostly about:
  - Career functions (planning next moves, how to take charge in next roles, and figuring out how to achieve career goals)
  - Received active sponsorship by the mentor (advocacy, resources, visibility, opportunities, network connections)
  - Had mentors with higher clout

• Similar numbers of lateral moves were given to men and women
• Men were promoted after the lateral moves; for women, the moves were offered in lieu of advancement.

“Why Men Still Get More Promotions Than Women”
Mentoring Challenges

• Department size: Sometimes not enough senior faculty mentors to go around
• Time challenges: the best mentors are very busy; and mentees don’t perceive their time investment to be worthwhile
• Culture: Junior women faculty don’t want to “impose” on senior faculty
• Perceptions and expectations of mentoring differ between senior and junior faculty
• Associate to full professor mentoring sometimes falls through the cracks
• Departments are left to manage on their own; few school- or university-level resources and supports for mentoring
• Others …

Diana Bilimoria, IWIn 9-23-2010

Formats of Mentoring

• One-on-one mentoring
• Committee mentoring
• Peer group: seminars, panel discussions
• Academic performance and career development workshops
• Zone mentoring (by area of expertise)
• E-mentoring
• Travel support to meet disciplinary mentor outside the university
• Annual review meetings with chair and mentors
• Wise Guys – use your senior faculty who may have some free time

Diana Bilimoria, IWIn 9-23-2010
How A Chair Can Change the Climate

Motivate change within department: develop compelling rationales for change, focusing on benefits to department

- use gender as window on departmental effectiveness
everyone benefits: continuous thread linking students, post-docs, women and men faculty
- attract more women as faculty
- improve morale

Accountability: Principles and actions for chairs and unit heads, Virginia Valian, Hunter College, GEP
http://www.hunter.cuny.edu/genderequity/equitymaterials.html

How A Chair Can Change the Climate (2)

Develop faculty for leadership positions within institution
- establish paths toward leadership
- place women and minorities on important committees
- provide guidelines on how to run committees
- have periodic meetings with interested faculty to explain how decisions are made within institution

Accountability: Principles and actions for chairs and unit heads, Virginia Valian, Hunter College, GEP
http://www.hunter.cuny.edu/genderequity/equitymaterials.html
How A Chair Can Change the Climate (3)

Develop a diverse circle of advisors

- determine what you need and who can fulfill those needs
- include people who will provide constructive criticism and reasoned objections
- chairs are at risk of isolation from and lack of knowledge of hidden problems – everyone tends to assume their unit is working well unless there are major overt signs to the contrary

Accountability: Principles and actions for chairs and unit heads, Virginia Valian, Hunter College, GEP
http://www.hunter.cuny.edu/genderequity/equitymaterials.html

How A Chair Can Change the Climate (4)

Develop procedures to counteract unintended bias

- review colloquium speaker roster - reflect % women grad students & in field
- run faculty meetings so that everyone’s voice is attended to
- review letters of recommendation for “gender equity”
- review workload assignments (teaching and service) for equity  
  - importance of assignment  
  - labor-intensiveness of assignment  
  - visibility  
  - scope for innovation
- ensure that departmental-internal staff respond equally promptly and fully to males and females, non-minority and minority
- ensure that women and minorities have a voice in hiring

Accountability: Principles and actions for chairs and unit heads, Virginia Valian, Hunter College, GEP
http://www.hunter.cuny.edu/genderequity/equitymaterials.html
Essential Take Home Advice
for the Best Climate

For the advancement of women and minorities (and the benefit of all faculty), a department’s policy should aim for

- **Transparency**: Making all kinds of information available and easy to find
- **Uniformity**: Leveling the field and dealing equitably with all faculty
- **Assistance**: Attending to the needs of faculty; offering mentoring and other types of help

Best Practices – University of Michigan ADVANCE Program
